EDUCATION

B.S. Mechanical Engineering | Mechatronics Emphasis

University of Utah John and Marcia Price College of Engineering

Spring 2027

GPA: 3.39

EXPERIENCE

UofU | Undergrad Researcher

May 2025 - Present

- Developing automated experiments with microcontrollers and DAQ equipment
- Designed experiment to gather data needed for senior design teams

ATL Technology | Manufacturing Engineering Technician

April 2023 – July 2024

- Designed fixtures in SOLIDWORKS, reducing process time and improving pass/fail rates—resulting in \$17,000 in annual cost savings
- Validated new processes and software for medical device manufacturing
- Designed test fixtures and conducted Measurement System Analysis (MSA)
- Authored and maintained SOPs and validation documentation
- Proposed and improved PM docs, reducing line-down events and spare part shortages

EXTRACURRICULAR

Ucubesat Club (University of Utah) | Mechanical Engineering Team

Fall 2024 – Present

- Designed CAD model for electronics housing of weather balloon
- Coordinated space requirements with telemetry and electrical teams
- Gained exposure to space engineering industry

E2i Entrepreneurship Institute (Utah Valley University)

Spring – Summer 2024

- Received a grant to develop a prototype of Dobsonian telescope design
 - Developed prototypes focusing on manufacturability at scale
 - Gained experience in working with machine shops
- Worked on a university funded project to develop an innovative sprinkler design
 - Reverse-engineered existing sprinkler design to identify possible improvements
 - Delivered engineering drawings that could be used for creating a patent

PROJECTS

Self-Directed Telescope Design Project | 2021–2024

- Designed and built a computerized telescope mount integrating CAD, CNC, and 3D printing
- Soldered and configured OnStep open-source controller for motorized slewing and tracking
- Iterated designs based on field testing, gaining experience in embedded systems and DFM

SKILLS

- SOLIDWORKS CSWA
- OnShape
- Autodesk Fusion 360
- Python

- MATLAB
- Spanish - B2 level
- Certified IPC Specialist
IPC/WHMA-A-620

- Manual and CNC machining
- 3D printing
- Soldering
